**Notes from Veeam Training Video**

**Restore an Exchange Mailbox or Item - Veeam's Exchange AIR** (Application Item Recovery) - http://dl.dropbox.com/u/61607552/Email%20Restore.mp4

1.     Click "**Restore**" button and select radio button of **Application items,** shown in the screenshot below:
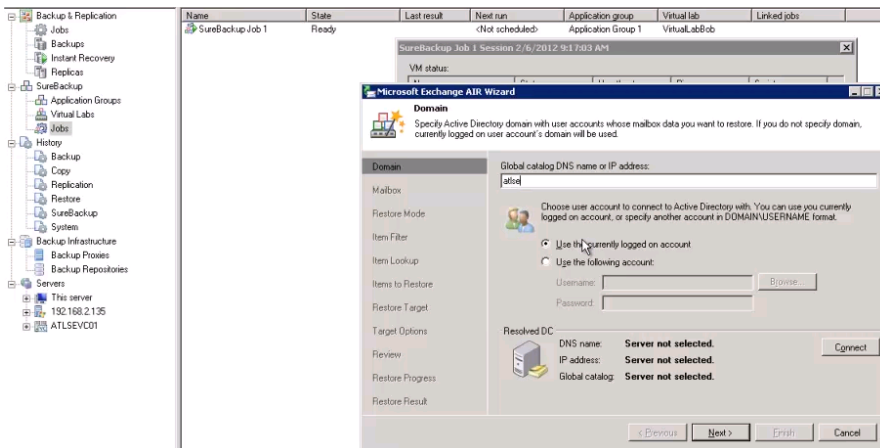

Download & install **Veeam_B&R_Exchange_AIR_Setup.exe** on the Veeam server by typing the IP address of the Exchange server etc.
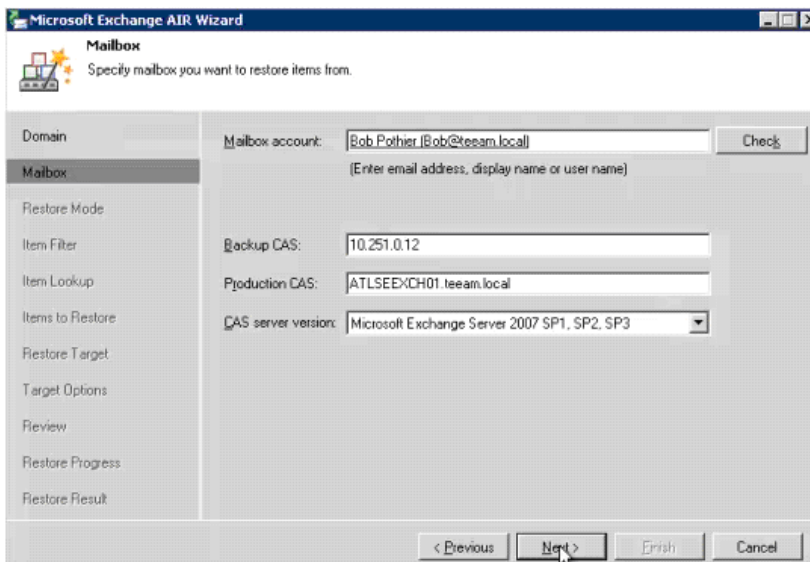

2.      Under SureBackup section, select "**Jobs**" and right-click on the

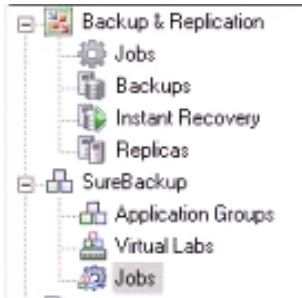

Exchange server and select "**Restore Exchange Item**", as shown in the screenshot below:

Follow the onscreen instructions, and type the right into in to a box until the end of the wizard:

**Microsoft Exchange AIR Wizard**

**Restore Mode**

Select All    Clear All    1 out of 2 items selected
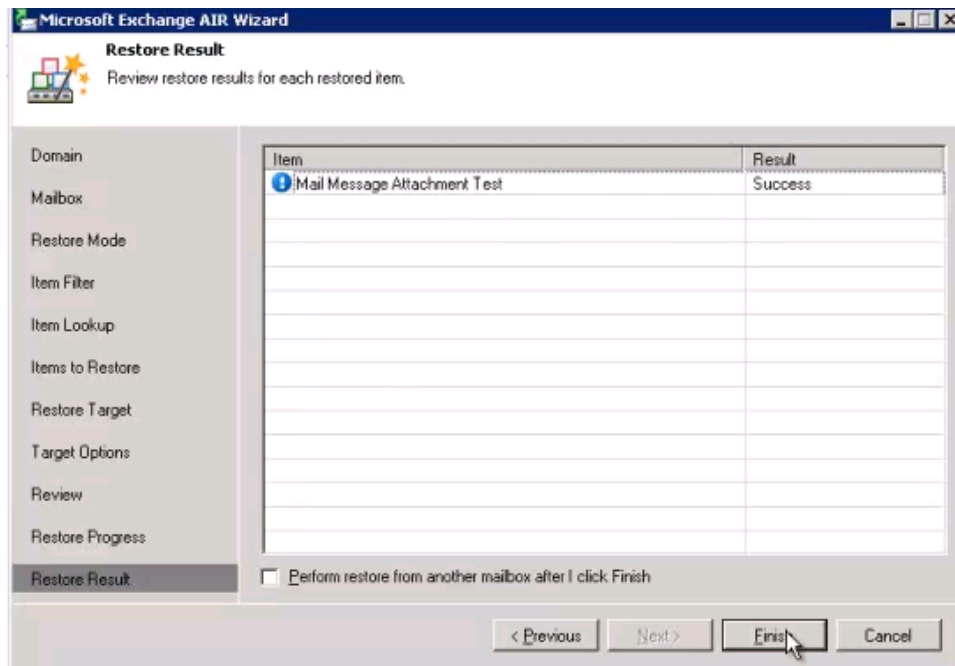

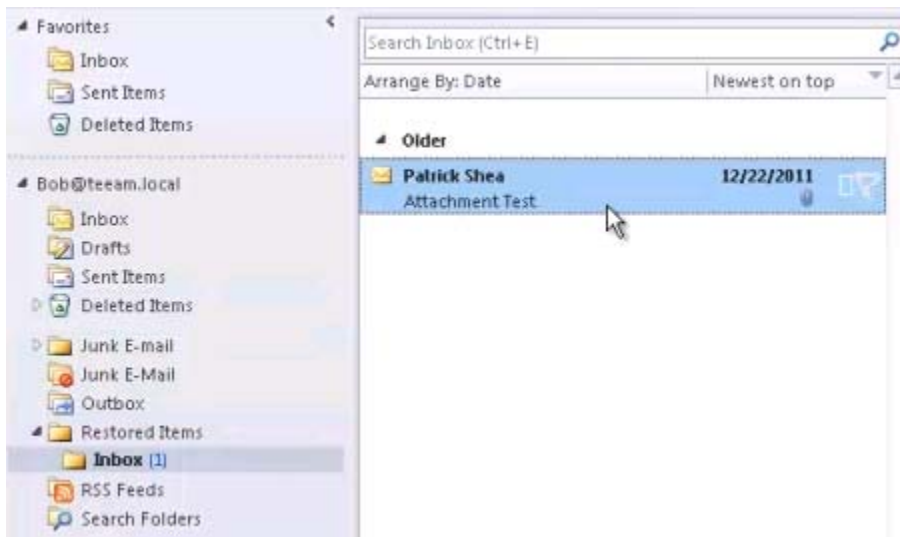

< Previous    Next >    Finish    Cancel

Note:  This is a restored folder that will appear inside an inbox at Outlook client

Click "**Next**" and "**Restore**" button to continue.

3. Now, log in to the mailbox. The "**Restored Items**" folder should be there, as shown in the screenshot below:

Verify the restored item – email.

The end of the restoration!
